

*Efficient & Effective*

**MOBILE LARGE WOOD CHIPPER**

**Features :-**

**Versatile Shredding:** Ideal for processing branches, leaves, crop straw, and pasture. Converts materials into wood chips and powdered pellets.

**Comprehensive Biomass Processing:** Suitable for shredding cotton stalks, bark, branches, corn stalks, wheat stalks, and other biomass.

**Wide Application:** Processed products can be used for edible fungus cultivation, power generation, papermaking, wood-based panels, and ethanol refining.

**Industry Usage:** Extensively utilized in the power generation industry, particularly in straw power plants, as well as in papermaking and wood-based panels.

**Hydraulic Motor:** Provides robust, reliable roller power.

**Three-Speed Control:** Manual settings for forward, stop, and reverse.

<b>Model</b>	<b>TKWC-490</b>
Shredder Inlet Size (mm)	400 x 500
Engine	GBH 4DHZG
Engine Type	Water-cooled Diesel Engine
Power (kW/rpm)	60 / 2400
Starting Mode	Key Start
Discharge	360° Rotatable
Discharge Height (m)	2.5
Cutting System	Longitudinal Cutting
Cutting Blades	6 moving blades, 1 fixed blade
Production efficiency (ton/hr)	3-5
Mobility	Trailer type
