

RIVER SAND PUMP

TRSP-150 River Sand Pump produces a huge suction by the high speed rotation of the impeller, specifically engineered for efficient river dredging operations. Ideal for extracting small granular sand, sediments, and debris from the bottoms of lakes, rivers, harbors, and other water bodies.

Features :

- High efficiency, ensuring a large output and facilitating effective sand extraction.
- Engineered for stability and advantageous to loading.
- Easily replaceable liners are bolted, not glued to the casing, ensuring positive maintenance and extending the pump's lifespan.

Model	TRSP-150
Max. Flow (m ³ /h)	250
Total Head (m)	18
Engine	Beinei F3L912 Air-cooled Diesel Engine
Power (Hp)	29.5
Suction x Delivery Diameter (inch)	6
Weight (kg)	735
Dimension (LxWxH) (mm)	1800 x 1040 x 1560
